No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

NDAD_ALCXX Alcaligenes xylosoxydans xylosoxydans (Achromobacter xylosoxidans). Bacteria; Proteobacteria; beta subdivision; Alcaligenaceae; SEQUENCE FROM N.A., AND PARTIAL SEQUENCE NCBI_TaxID=515;

MEDLINE-96100942; PubMed-8541651; Wakayama M., Katsuno Y., Hayashi S., Miyamoto Y., Sakai K., Moriguchi M.;

"Cloning and sequencing of a gene encoding D-aminoacylase from Alcaligenes xylosoxydans subsp. xylosoxydans A-6 and expression of the gene in Escherichia coli.";
Biosci. Biotechnol. Biochem. 59:2115-2119(1995).
-I- FUNCTION: HAS A WIDE SPECIFICITY; HYDROLYSES N-ACYL DERIVATIVE NEUTRAL D-AMINO ACIDS.
-I- CATALYTIC ACTIVITY: N-acyl-D-amino acid + H(2)0 - an acid + D-

amino acid. COFACTOR: ZINC.

얽

÷ SUBCELLULAR LOCATION: Cytoplasmic.
SIMILARITY: BELONGS TO THE N-ACYL-D-AMINO-ACID DEACYLASE FAMILY.

Campbell B.G., Wootton J.A.M., McLeod J.N., Minor R.R.;
Sequence of normal canine COLIA1 cDNA, ";
Submitted (MAY-1999) to the EMBL/GenBank/DDBJ databases.

I- FUNCTION: TYPE I COLLAGEN IS A MEMBER OF GROUP I COLLAGEN

SUBMIT: TRIMERS OF ONE ALPHA 2(I) AND TWO ALPHA 1(I) CHAINS.

UNIT (G-X-Y) ARE HYDROXYLATED IN SOME OR ALL OF THE CHAINS.

UNIT (G-X-Y) CONTAINS 1 VWFC DOMAIN.

                                                                                                                                                                                                                                                                                  In codons is given for each CDS.

Usually the highest scoring match found by fasta o is given for CDS which show significant similarity to other CDS in the database. The position of possible ribosome binding site sequences are given where these have been used to deduce the initiation codon. Gene prediction is based on positional base preference in codons using a specially developed Hidden Markov Model (Krogh et al., Nucleic Acids Research, 22(22):4768-4778(1994)) and the FramePlot program of Bibb et al., Gene 30:157-66(1984) as implemented at
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     Submitted (31.MAY-2001) Streptomyces coelicolor sequencing project, Sanger Centre, Wellcome Trust Genome Campus, Hinxton, Cambridge CB10 15A E-mail: barrellesanger.ac.uk Cosmids supplied by Prof. David A. Hopwood, [3] John Innes Centre, Norwich Research Park, Colney, Norwich, Norfolk NR4 7UH, UK On May 9, 2002 this sequence version replaced gi:14285271.
                                                                                                          jun/cgi-bin/frameplot.pl. CAUTION: We may not have predicted the correct initiation codon. Where possible we choose an initiation codon (atg, gtg, ttg or (att)) which is preceded by an upstream ribosome binding site sequence (optimally 5-13bp before the initiation codon). If this cannot be identified we choose the most
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              O'Neil, S. ar
